Technology and Business Information
for the Gas Processing Industry

PROCESSING

Technology, News, Projects and Trends for Gas Processing

Gas processing has a direct and profound impact on the upstream, midstream and downstream sectors of the global oil and gas industry. New discoveries and drilling techniques, in combination with advances in process technology, have spurred rapid growth in the industry. Through the application of new technologies, gas processing, transport and consumption are more cost-effective and efficient. These new technologies have the potential to redefine global gas markets as well as increase demand and applications for natural gas. In North America, the gas processing industry is growing at approximately 30 percent per year. The gas processing industry is poised to make gains in the Middle East, Asia and South America. Gas Processing is being introduced in July 2013 to serve this vital growth industry.

Gas Processing and Gasprocessingnews.com are the newest information platforms from Gulf Publishing Company, publisher of *Hydrocarbon Processing* and *World Oil*. Gas Processing will offer the same high-quality, real-time information on technical developments, market trends and news that the industry has come to expect from *Hydrocarbon Processing* and *World Oil*.

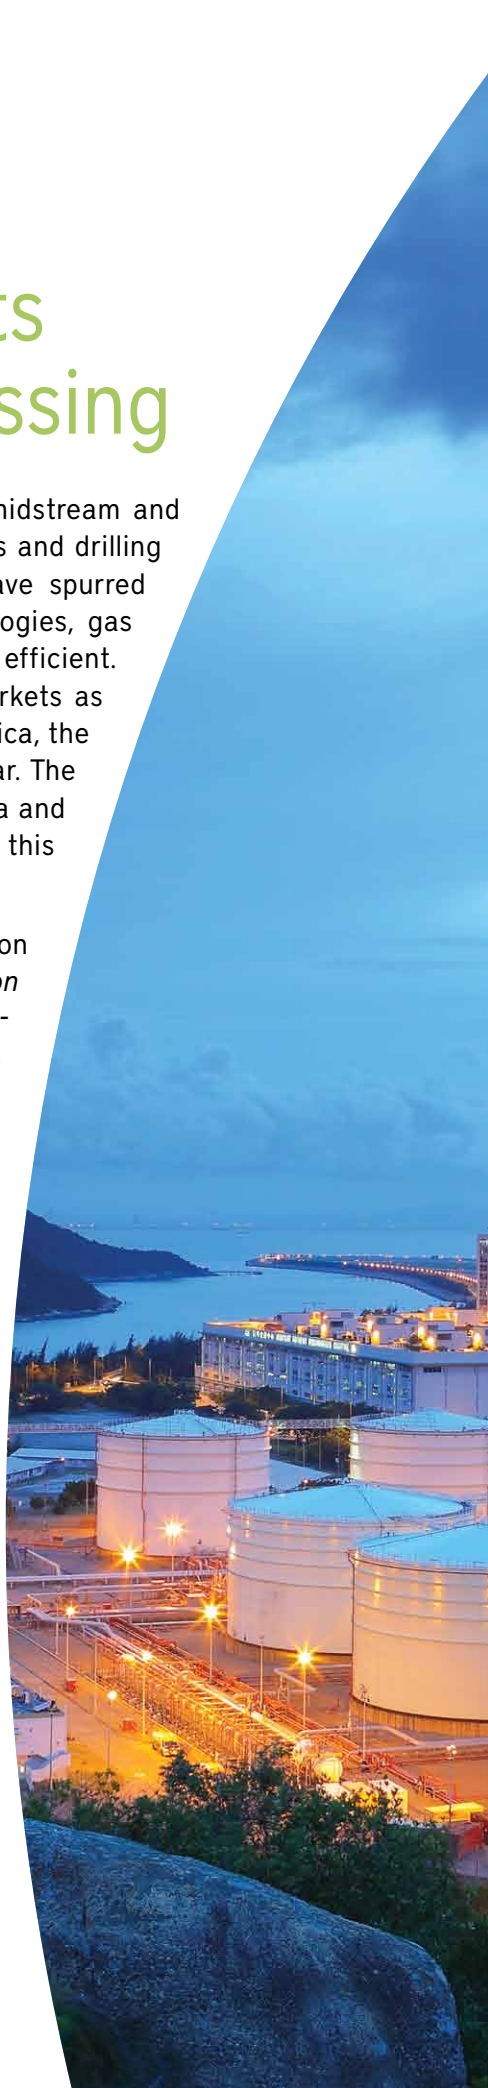

Gas Processing will deliver informative technical features under these topic areas:

- Process Technologies
- Operations and Maintenance
- Equipment
- Environment/Regulations

The publication will deliver processing technology, innovative equipment developments, trends, market insight and new advancements for these areas of the gas processing industry:

- Natural Gas Liquids (NGLs)
- Gas-to-Liquids (GTLs)
- Liquefied Natural Gas (LNG)
- Liquid Petroleum Gas (LPGs)

GasProcessingNews.com will deliver breaking news, while offering a database of gas processing projects. Gas processing projects will include real-time listings of new and existing projects, information on E&Cs and project scope, and contacts for each of the new projects listed.

A World of Opportunities in Gas Processing

Gas Processing will be the first publication solely devoted to the gas processing industry, with distribution among upstream, midstream, and downstream executives and engineers. Recipients of Gas Processing include engineering and operating management personnel from operators and engineering companies.

By placing your advertisement in Gas Processing, you will reach your market segment by targeting professionals who influence and make purchase decisions for equipment, processing technology, quality assurance services and engineering/procurement services. For the fast-growing gas processing industry, there is now one platform providing you with a targeted and efficient means of reaching decision-makers in gas processing.

The inaugural July 2013 issue will include these important features:

- Gas Processing for Shale Gas in North America:

- 1) Trends in technology and engineering,
- 2) Market Data/information on new plants
- 3) NGLs

- GTLs:

- 1) New GTL Technologies
- 2) GTL economics
- 3) modular GTL.

- Equipment:

- Metering equipment
- Valve overview

GasProcessingNews.com, the website for Gas Processing, will provide daily news for the gas processing industry as well as feature articles and insights into the latest happenings and technology in the industry. The site will launch July 1, 2013, with news, features, project information and market data. Gasprocessingnews.com will provide a timely and interactive means of connecting with your prospects. Banner advertisements brand your company while driving traffic to your website. Lead generation products, such as white papers and webcasts, will give you as a marketer a way to deliver highly qualified leads to your sales team.

Gas Processing Market Intelligence – Gas Processing will offer the market a database of new gas processing projects, with project scope, timeline, and contact information.
